CLIMATE ACROSS SYSTEMS · NO. 8

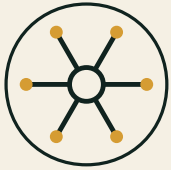

Before the next shock, who can act?

Zambia has released relief-food money. SADC's regional plans await ministers and finance.

Warnings have to meet spending authority, available resources and services people can reach.

28 October 2026 · Reporting 21–27 October

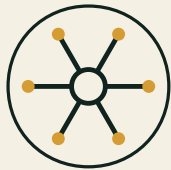

K31.7 million released. Which households are reached?

Provincial procurement and distribution are reported.
District allocations, quantities, recipients and dates
remain open.

Nine- and ten-province accounts conflict. A reconciled
allocation schedule is needed before claiming complete
coverage.

Government summary · 23 Oct; Diamond Media · 26 Oct

SADC · NOVEMBER DECISION

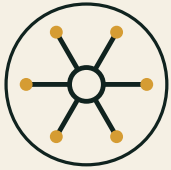

Three instruments validated. Most early action unfunded.

A regional anticipatory-action framework, prepositioning strategy and seasonal contingency plan have been validated.

Ministers decide in November. Costed actions, triggers and pre-arranged finance would turn approval into an operating commitment.

SADC closing statement · 23 October 2026

GOVERNANCE | CLIMATE | PUBLIC SYSTEMS

KENYA AND SUDAN · DIFFERENT CLOCKS

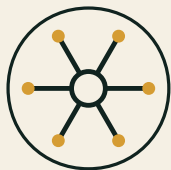

The urgent decision is different in each place

Kenya: the rainfall forecast peaks on 26–28 October. Local activation and service continuity need evidence.

Sudan: the 27 October UN briefing warns of November food-assistance cuts. Its 900,000 estimate and WFP's 800,000 estimate remain unreconciled.

MOROCCO · REFORM FINANCE

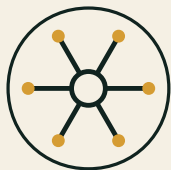

Water and electricity inside the fiscal decision

US\$487 million in reform support has reached Bank approval. That establishes neither disbursement nor infrastructure delivery.

The public test is how utility governance, investment and fiscal costs affect service reliability and affordable bills.

MADAGASCAR AND CAMEROON · CAPABILITY

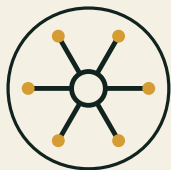

Build the equipment. Keep the knowledge usable.

Madagascar reports a locally made weather station at Boanamary. Calibration, repairs and rights to use observations determine its lasting value.

Cameroon's planned energy accounts would include biomass and self-generation. Published methods and pilot tables are the next test.

TERRITORIAL EVIDENCE

Six national cases. One regional decision.

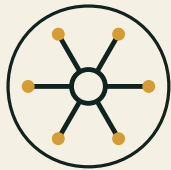

National evidence does not establish uniform local delivery in Zambia, Kenya, Sudan or Morocco.

Madagascar: one station at Boanamary. Cameroon: national accounts; workshop in Soa.

SADC: regional validation, not a country score. The edition's maps locate evidence, not hazard severity.

THE COST OF WAITING

Procurement has a clock of its own

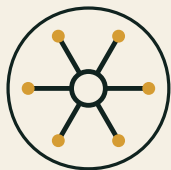

Suppliers, contracts, transport and payment all consume forecast lead time.

Reversible preparation and costly commitments need different thresholds under each jurisdiction's law.

WMO's Pacific anomaly is a global forecast driver, not an African temperature rise or a local rainfall probability.

A KENYAN PROPOSITION

Buy readiness as part of the service

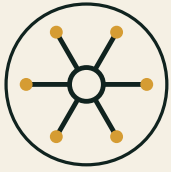

Test readiness clauses in one willing county's existing emergency-referral service, after legal and fiscal review.

100 days: baseline, consultation, costed specification and one activation exercise.

Three years: independently assess availability, interruptions and whole-life costs. By 2035: expand only where evidence and recurrent budgets support it.

Proposition, not an approved or financed programme
